SUMMARY

- Software Developer skilled in Java, Data Structures, and Algorithms. Experienced in building scalable web applications using React.js, Node.js, Express.js, MongoDB, and SQL. Proficient in developing RESTful APIs and optimizing backend performance.

EXPERIENCE

SkillBoom Jun 2025 – Aug 2025
Role - Web Developer Bhopal, Madhya Pradesh

- Rectified 10 critical bugs within the application's backend, identified through systematic testing, which enhanced application stability and ensured data integrity for over 750 active users.
- Improved debugging efficiency by identifying root causes, reducing recurring issues by 20%.

RCPL (Full Stack Training) Sept 2024 – Nov 2024
Full Stack Web Developer Trainee Kanpur, Uttar Pradesh

- Designed 4 database tables with optimized schemas, implemented full CRUD operations, and reduced API response time by 18% by optimizing SQL queries within the Spring Boot application.
- Collaborated with team members to develop and test REST APIs, improving overall system performance.

PROJECTS

Blog App [Link]

- Built and managed backend services for a MERN-based Blog App using Node.js, Express.js, and MongoDB, handling 500+ API requests/day.
- Optimized backend performance and implemented secure data handling, reducing response time by 25% and improving reliability.
- Implemented JWT-based authentication and authorization, improving application security.

Workflow Pipeline Builder [Link]

- Developed a full-stack Visual Workflow Pipeline Builder using React.js and FastAPI, enabling users to create and manage node-based workflows with a drag-and-drop interface.
- Implemented backend logic to process pipeline data, calculate nodes and edges, and validate Directed Acyclic Graph (DAG) structure, improving system reliability and workflow accuracy.
- Designed an interactive UI improving user workflow creation efficiency by ∼30%.
